eCycleSecure is a recycler, and as such, our volume is based on the material provided by our customers. Similarly, we cannot affect the toxicity of the materials chosen by manufacturers in product made 10 to 20 years ago. That being said, we take steps in our operation to make sure we are handling material safely, and that any risk to health and safety, or to the environment is mitigated to the greatest extent possible.	The volume processed has gone down by 30% when compared with 2016. That is strictly a function of the supply generated by our customers.
